

## BTEC

While completing the BTEC course you will learn about a wide variety of Media and ICT applications, to help you finish the course successfully I would like you to build a website to promote the Highdown Sixth form centre.

This will involve:

- Learning the basics of building a website from scratch (codecademy)
- Learning the basics of photo editing (use any package, though Photoshop would be useful, gimp is a good free alternative).
- Bonus points for hosting the website on a server (find a free student service, such as github).

It is also essential that you purchase the course text:

**BTEC Nationals Information Technology Student Book + Activebook  
Pearson by Jenny Phillips and Alan Jarvis.**
