

Exciting Minds

With over 300 years of innovation, we're a **science-led global healthcare company** that delivers billions of innovative products each year. With us, you can take on some of the world's biggest health challenges – helping millions do more, feel better, live longer. The scope and breadth of our business is reflected in the **range of apprenticeship opportunities we offer** to talented and ambitious individuals. Our apprenticeships will give you hands-on experience in your chosen discipline and the opportunity to play a key role in contributing to the future success of the company.

We're 100% open to all talent – whatever your gender, marital status, religion, age, colour, race, sexual orientation, nationality or disability. We want to recruit the right people for GSK from the widest possible backgrounds, so we can better serve the diversity of our patients and consumers and also, because it's the right thing to do.

We offer apprenticeships in a variety of UK locations so depending on your location, you can apply for one of our programmes at your chosen site.

Science is core to our success and we're always looking for those with a background in STEM subjects. However, we also have opportunities, for example in **Finance and Cyber Security**.

Explore our different [Advanced](#), [Higher](#) and [Degree](#) apprenticeship programmes to discover how each one offers you the chance to take on the global health challenges of today and tomorrow.

If you're looking for an **alternative route to college or university**, our apprenticeship programmes have been designed for you! We developed our apprenticeship programme to create an alternative career route and ensure that we provide opportunities for as many people as possible. While you learn on-the-job from industry leaders (and earn a competitive salary), you will study towards a nationally recognised qualification. [Apply Now](#)
