

A **University of Reading open online course** (OOC) gives you the opportunity to learn from expert staff within our world-class departments. These online courses offer a captivating glimpse into new subject areas, which might have seemed out of reach before.

As well as offering a wealth of new ideas and resources, an OOC is a great way to make CVs, applications and personal statements stand out from the crowd. Explore a selection of our OOCs below, or visit www.reading.ac.uk/oocs for our full range of courses.

Rome: a Virtual Tour of the Ancient City

Start date: 24 June 2019

This ground-breaking course uses a unique 3D model to explore the city's architecture and history.

Understanding Depression and Low Mood in Young People

Mental health problems affect around one in ten children and young people in the UK so spotting early signals can be crucial. This essential course helps parents recognise depression and low mood in teenagers and discover practical techniques to help support them.

Our OOCs

Our OOCs range from two to five weeks of interactive content, only requiring a few hours' of study per week to complete with no pre-requisites for joining.

We offer OOCs in topics not typically encountered in the classroom, such as Meteorology, Archaeology, and Real Estate, as well as more familiar areas including Biology, History and Computer Science, so students can ignite a new interest or build on a current one
